“Habitat for Humanity GTA’s ReStore has been our top of mind salvage resource at Sarah Richardson Design for over a decade. Having the opportunity to renovate and redesign homes for our clients is an exciting process, and Habitat’s salvage program is an important part of our projects.

Knowing that salvaged materials are being reused and recycled, thanks to Habitat, gives our clients’ satisfaction, and the capable and friendly staff and volunteers make donating to Habitat both cost-effective and convenient. Whether picking-up, dropping off, or salvaging items; the ReStore always provides an extraordinary level of service. Before demolition starts, I’m always happy to give Habitat the chance to remove unwanted materials in good condition, which allows us to help the environment by recycling.

I highly recommend considering Habitat for Humanity GTA’s ReStore for your next renovation project!”
